## **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: prior art of record does not teach or suggests in combination a spread spectrum signal processing apparatus comprised of a control means that supplies each of a plurality of divided codes sequentially to a correlator and a signal processing means as recited in claims 14, 15 and 17, respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following references disclose systems that correlate a spread spectrum signal with divided PN sequences: Sourour et al. (US Patent No. 6,363,105 B1), Disselkoen et al. (US Patent No. 6,556,167) and Van Stralen et al. (US Patent No. 6,621,855). However, these references do not teach providing the each of the plurality of divided sequences sequentially to the correlator, as recited in the respective independent claims.
